

The **APEX Regional Innovation Network (RIN)** is a collaborative partnership made up of organizations in SE Alberta that support innovation-driven entrepreneurs, startups, and enterprises. We work together to provide a single vision and voice regarding the priorities of SE Alberta's innovation community.

APEX is supported by Alberta Innovates' Regional Innovation Network (RIN) program, with services available across the province, to support innovative businesses, entrepreneur development and job creation for the growth and diversification of the Alberta economy. The main objective of all the RIN's across the province to increase the number of start or scale up technology or knowledge-based business in Alberta and support the ecosystem that fosters innovators.
